## Summary

Computer Science student with strong fundamentals in **Java, Linux environments**, and **Docker containerization**. Hands-on experience in building and testing network-based applications and deploying systems in **Linux environments**. Demonstrates a practical understanding of system fundamentals, problem-solving, and the ability to learn quickly in **enterprise IT environments**.

## Projects

**Linux System Resource Monitor** | *C, Linux, ProcFS, Shell* 2025

- Engineered a command-line monitoring utility to analyze **CPU, memory, and process usage** similar to top/htop.
- Parsed system statistics from **/proc filesystem** for real-time resource tracking and insights.
- Implemented alert logs for high resource consumption supporting fast system diagnostics and debugging.
- Ensured compatibility and efficient execution across major Linux distributions.

**Containerized Java Socket Application** | *Java, Docker (Basics), Linux* 2025

- Developed a client-server communication application using **Java Socket Programming** for basic real-time data exchange.
- Created a **Dockerfile** to containerize the application, ensuring consistent execution across different Linux environments.
- Used Docker commands to build and run containers, reducing manual setup of JDK and application dependencies.
- Tested and executed the containerized application on Linux systems to validate portability and reliability.

**Smart City Solutions Platform** | *HTML, CSS, Basic JavaScript, Linux* 2024–2025

- Developed a web-based platform to present **smart city services and urban information** in a structured and user-friendly manner.
- Built responsive layouts using **HTML and CSS**, focusing on accessibility, clarity, and consistent UI design.
- Used **basic JavaScript** for simple client-side tasks such as form input validation and UI interactions.
- Hosted and tested the application on a **Linux environment**, ensuring correct file structure, permissions, and stable execution.

## Education

**Bachelor of Engineering in Computer Science & Engineering** 2022 – 2026
*Chandigarh University* *Mohali, Punjab*

**Intermediate (Class XII)** 2019 – 2021
*BK Public Senior Secondary School* *Jahangirabad, Uttar Pradesh*

**Matriculate (Class X)** 2019
*St. Joseph's Senior Secondary School* *Jahangirabad, Uttar Pradesh*

## Additional Information

- **Programming**: C, C++, Java, JavaScript (basic), SQL
- **Systems**: Linux (file operations, permissions, processes)
- **Networking**: TCP/IP (basics), SSH, ping, traceroute
- **Tools/DB**: Git, VS Code, MySQL, Docker (basics)
- **Languages**: English, Hindi, German (A1)
- **Certifications**: German Language A1, MySQL Fundamentals, Linux Commands & Shell Scripting, Accenture Nordics – Software Engineering Job Simulation, Accenture UK – Developer & Technology Job Simulation
- **Interests**: Problem solving, system troubleshooting, exploring Linux and tech industry trend
